Protection categories	Parque Nacional y Monumento Natural

Major biomes	It contains 3 biogeographic provinces within its territory. It represents the southernmost extent of the Chilean Nothofagus province, areas corresponding to the Southern Andean province, and transitioning towards the Patagonian province.
--------------	---

Short description

The Torres del Paine Biosphere Reserve is a protected area located in the Magallanes Region and Chilean Antarctic, at the southernmost tip of Chile. This reserve is renowned for its spectacular natural beauty and is one of the most popular destinations for ecotourism and hiking in South America. It boasts a vast richness of fauna and ecosystems, with the presence of 130 bird species, including the highest reported richness of raptors in a Chilean protected area. The Torres del Paine Biosphere Reserve is the territory of the largest feline in Chile and the most widely distributed in the Americas, the Puma (Puma concolor), considered as a flagship species

Management entity	National Forestry Corporation
-------------------	-------------------------------

Management

Climate change, biosphere reserve seal, reaffirmation of local management council, and dissemination
