Reserva de Biosfera	Intercontinental del Mediterráneo
Año de declaración	2006
País	España/Marruecos
Región biogeográfica	Mediterránea
Categorías de protección	Sección Andalucía-España: 1 Parque Nacional, 4 Parques Naturales, 4 Parajes Naturales, 6 Monumentos Naturales, 20 ZEC, 8 ZEPA y 1 Parque periurbano. Sección Marroquí: 1 parque nacional, 1 futuro parque natural, 5 Sitios de Interés Biológico y Ecológico (SIBE)
Principales biomas	Su bioma general es el referido al bosque mediterráneo
Breve descripción	Esta reserva discurre como un arco abierto al mediterráneo, ejerciendo de doble encrucijada entre Europa/África y Mediterráneo/Atlántico. Un permanente y privilegiado corredor de flujos naturales y humanos que conecta continentes, mares, húmedas masas de aire y multitud de culturas. Actualmente la RBIM funciona, ambientalmente, como una isla de humedad en un entorno tendente a la aridez; y, socialmente, como un escenario fronterizo donde trabajar por el desarrollo humano desde el patrimonio natural.
Entidad gestora	Comité Mixto de Coordinación de la RBIM
Gestión	Las líneas de gestión se recogen en el Plan de Acción de la RBIM 2016-2025, que tiene su marco en el citado memorándum. En conservación, además del trabajo con especies emblemáticas como puede ser el pinsapo y grandes rapaces, se trabaja mejorando las condiciones para el tránsito de aves (llegan a contabilizarse mil aves por hora) y cetáceos por el corredor marítimo incluido en la RBIM; así como con prevención de incendios forestales y otros posibles riesgos. En desarrollo social sostenible, se trabaja en impulsar las producciones de calidad derivadas de sus recursos agropecuarios, en el turismo sostenible como actividad complementaria y, de cara al próximo plan de acción, contar con una estrategia de desarrollo sostenible. En capacitación, gobernanza, difusión e información se está priorizando la elaboración de una estrategia de comunicación y el intercambio de experiencias en investigación aplicada a la gestión, manejo y prácticas del alcornocal, o sensibilización sobre el cambio global y sus efectos en medios mediterráneos.
Intercontinental del Mediterráneo Red Mundial de Reservas de Biosfera de Montaña <i>World Network of Mountain Biosphere Reserves</i>	

<i>Biosphere Reserve</i>	<i>Mediterranean Intercontinental</i>
<i>Year of designation</i>	2006
<i>Country</i>	<i>Spain/Morocco</i>
<i>Biogeographic region</i>	<i>Mediterranean</i>
<i>Protection categories</i>	<i>Andalucia-Spain Section: 1 National Park, 4 Natural Parks, 4 Natural Sites, 6 Natural Monuments, 20 ZEC, 8 SPA and 1 peri-urban Park. Moroccan Section: 1 national park, 1 future natural park, 5 Sites of Biological and Ecological Interest (SIBE)</i>
<i>Major biomes</i>	<i>Its general biome is that referred to as the Mediterranean forest.</i>
<i>Short description</i>	<i>This reserve runs like an arch open to the Mediterranean, acting as a double crossroads between Europe/Africa and the Mediterranean/Atlantic. A permanent and privileged corridor of natural and human flows that connects continents, seas, humid air masses and a multitude of cultures. Currently, the RBIM functions, environmentally, as an island of humidity in an environment prone to aridity; and, socially, as a border scenario where we can work for human development from natural heritage.</i>
<i>Management entity</i>	<i>RBIM Joint Coordination Committee</i>
<i>Management</i>	<i>The management lines are included in the RBIM Action Plan 2016-2025, which has its framework in the aforementioned memorandum. In conservation, in addition to working with emblematic species such as the Spanish fir and large birds of prey, work is being done to improve the conditions for the transit of birds (up to a thousand birds per hour) and cetaceans through the maritime corridor included in the RBIM; as well as with prevention of forest fires and other possible risks. In sustainable social development, work is being done to promote quality production derived from its agricultural resources, sustainable tourism as a complementary activity and, with a view to the next action plan, having a sustainable development strategy. In training, governance, dissemination and information, priority is given to the development of a communication strategy and the exchange of experiences in research applied to the management, management and practices of cork oak forests, or raising awareness about global change and its effects in Mediterranean environments.</i>

生物圈保护区	Mediterranean Intercontinental
指定年份	2006
国家	西班牙/摩洛哥
生物地理区	地中海
保护类别	安达卢西亚-西班牙段: 1个国家公园、4个自然公园、4个自然景点、6个自然纪念碑、20个ZEC、8个SPA和1个城郊公园。摩洛哥部分: 1个国家公园、1个未来自然公园、5个生物和生态遗址 (SIBE)
主要生物群落	它的一般生物群系被称为地中海森林。

简要介绍

该保护区像一个向地中海开放的拱门, 充当欧洲/非洲和地中海/大西洋之间的双重十字路口。一条永久且享有特权的自然和人类流动走廊, 连接着大陆、海洋、潮湿气团和多种文化。目前, RBIM在环境上的作用就是在一个容易干燥的环境中充当一个湿度岛;在社会上, 作为一个边界场景, 我们可以从自然遗产中为人类发展而努力。

管理实体	RBIM联合协调委员会
管理	

管理包含在《2016-2025 年 RBIM 行动计划》中, 该计划的框架在上述备忘录中。在保护方面, 除了与西班牙冷杉和大型猛禽等标志性物种合作外, 还致力于改善鸟类(每小时多达1000 只)和鲸类通过RBIM所包括的海上走廊的过境条件, 以及预防森林火灾和其他可能的风险。在可持续社会发展方面, 正在努力促进农业资源的优质生产, 将可持续旅游业作为补充活动, 并着眼于下一个行动计划, 制定可持续发展战略。在培训、治理、传播和信息方面, 优先考虑制定沟通战略并交流栓皮栎林经营、管理和实践的研究经验, 或提高对全球变化及其对地中海环境影响的认识。
