Biosphere Reserve	Monte Grappa
Year of designation	2021
Country	Italy
Biogeographic region	Alpine Biogeographical Region
Protection categories	The three Core Areas and the Buffer Area are entirely included in the SAC IT3230022 of the Monte Grappa massif.

Major biomes Absolute domination of the exalpic beech forests of Aremonio-Fagion.

Short description
The centrepiece of the Biosphere Reserve is based on Monte Grappa – being a “bio-ecological bridge” between the Po Valley and the South-Eastern Alps and a point of union-division and therefore of balance and exchange between climates, ecosystems, cultures and economies. For those reasons is a place rich in variety, where there are not only habitats and ecosystems typical of its own region, but also testimonies of the neighbouring ones. It is characterised by the presence of environments ranging from the plain to the hilly, to the high-mountain belt.
